

JUST CLEANINGS

COW 'HOOF' AFTER CALF

Maternal love is strong in domestic animals; so found out John J. Reagan of the Sturgis district last week when he sold a calf. He had sold the calf, and it was taken to Sturgis, from which point it was shipped. The mother "hoofed" it to town, and in a half mile, Mrs. Reagan knows that the calf was lost in Sturgis, but he hasn't been able to locate her to date, and wonders whether the cow followed the railway tracks after the calf.

STEFANSON MOOTS NORTH HIGHWAY TO ALASKA

Before leaving Edmonton by Trans-Canada Air Lines, Villiamur Stefansson, veteran Arctic explorer, told reporters that a highway into the North to Alaska would prove an important factor in the development of Canada's resources and also would play a vital role in international affairs. He spoke of three great routes: one through Vancouver and Prince George, the second north of (Prince George through the interior, to British Columbia to Dawson, and the third from Edmonton to the Athabasca River and north, connecting with highways from Canadian prairies.

CARBON SCHOOL CHRISTMAS CONCERT ON DECEMBER 20

The Carbon school will hold its annual Christmas concert at the Farmers Exchange hall on Friday, December 20th at 8 p.m. sharp.

As this is the High School room, to take the main part of the program, the students of the Carbon school are putting on a two-act mystery play, "The Elusive Aunt Laura," but there

CURLING CLUB EXPECTS TO HAVE TWELVE RINKS IN SEASON'S COMPETITION

At the meeting of the Carbon Curling Club held in the waiting room of the rink on Wednesday evening, December 4th, it was reported that from all indications there would be twelve rinks entered for competition this season.

The ice was reported ready for the final goal as soon as weather permitted. (This has also been put on).

The meeting decided to put in a ventilator in the waiting room to provide better circulation of air.

The purchase of a few sets of curling rocks by the club was discussed, but no action was taken at the meeting.

LOCAL BONSIEP

With curling now under way a lot of bonspiel is in progress to start the season with a bang, and following rinks are entered, with the following skip: Messrs. Cecil Allen, R. C. Downey, Syd Cummings, W. Leitch, S. Morrison, A. McKibbin, Alex Poxon, Len Poxon, S.J. Garrett, H. Woods, N. Wright, Mick Kerrigan and Fred

A knock-out competition is being played and results will be known in a day or two.

There will be the usual Christmas tree and carols for the children of school age and under, so come and have a good time.

WILFRED POXON ELECTED MAYOR OF DRUMHELLER

Wilfred Poxon, former Carbon resident, has been elected by acclamation to the position of Mayor of the City of Drumheller, according to word reaching Carbon last Wednesday.

In commenting on the election of Mr. Poxon, the Drumheller Plaindealer has the following to say: "Councillor Wilfred Poxon, who on January 1 will succeed the present incumbent (as Mayor) can be relied upon to start where Mayor Harley leaves off. Councillor Poxon in the twelve months as councillor, has shown himself to be courageous and ready to apply reforms."

"He has the sense of humor which is a valuable asset in such an office, and there is no doubt that he will conscientiously serve citizens at all times."

"We could have thought of no better choice than Councillor Poxon as successor to Mayor Hanley."

CARBON STORES ARE ALL DECORATED FOR THE COMING FESTIVAL SEASON

The festive season has rolled around again and a visit through the stores in Carbon will reveal the decorations ready for the Christmas season.

The local merchants all realize the necessity of keeping their stocks up to date, and in addition to their new Christmas goods they have full lines of seasonal articles.

The grocery stores are all so clean and bright, and the stocks of Christmas candies and good things for the table make one almost wish that Christmas was here.

The dry goods stores are replete with new goods for winter wear, and are showing innumerable articles of wear which make Christmas gifts of the more useful kind, many of them all wrapped and boxed ready for gift.

The hardware stores and drug stores with their wonderful display of gifts of silverware, china, toys, dolls, books and novelties, are a veritable Santa Claus Land and will be the centre of interest with people generally, and the younger people in particular.

Even the garages are not backward, and you can find Christmas gifts for the family and the car - hot water heaters, good covers, and many other gadgets suitable for Christmas giving.

Around the local stores and you will find almost anything you desire for Christmas. The merchants in Carbon this year and patronize the advertisers in this paper. They are inviting you to shop in their store and by so doing they assure you of quality goods at reasonable prices.

THE WORLD OF WHEAT REVIEWED WEEKLY BY MAJOR H.G.L. STRANGE

From information which the "Crop Watcher" is receiving, it seems evident that farmers are hesitating to sell their wheat, and many of them chase some better seed to improve this coming crop.

It is not surprising that this hesitation for so many different ideas are being expressed about what should be done about the next crop. Some think there may be a complete "Wheat Holiday" or that acreage will be drastically reduced by government control. Some even think, when they see the great surplus, that there is no future for wheat growing.

For my own part I do not hold with these views. I believe that almost all the present acreage should again be planted, which would result in a crop of 250 million, and even the present crop could easily grow a smaller crop than this.

If a sensible peace is made, the world will require the wheat. I believe, more Canadian wheat than it has taken in the past, and so I suggest farmers should not hesitate to grow as usual with the plan of using some of the wheat in order to maintain or improve the quality, hence the value of their wheat crop.

LONG YEARS AGO

December 12, 1929

The teachers at the Lennox school burned to the ground Tuesday morning. The fire started from an overheated stove.

Jack Ohihauser overturned his Ford coupe at the top of the hill last Friday but to no severe damage was done.

Skating and curling have commenced in Carbon. Good ice is reported and the weather is ideal for winter sport.

The play "Star Bright" drew a large crowd Friday night. The play was put on Wednesday night and was again played to a capacity house.

NOMINATIONS WILL BE HELD IN MUNICIPALITY IN DIVISIONS 1 AND 4

To Press For Gravel On Highway Number 26

The regular meeting of the Council of the Municipal District of Carbon was held in the municipal office on Tuesday, December 2nd, and routine business was dealt with, along with general matters.

Under the M.D. Act, the annual general meeting of the Municipality is to be held in February and the date was set for Saturday, February 15, 1941.

It was pointed out that nominations to fill the position of retiring councillors would be held for Divisions one and four in the Municipality, and John Atkinson was appointed Returning Officer. Deputy returning officers were also appointed as follows: Division one, J.A. Hudson; Division four, Geo. Appleyard.

If necessary to elect a member for the Municipal Hospital Board, returning officers will be necessary and the appointments were made: Division 3, L.E. Brown; Division 5, Chas. Atkinson and Fred Finlay; Division 6, H. Turner.

Messrs. Harold Offer and J.W. Olson delegates to the Alberta Municipal Districts Convention, gave a report on the proceedings, which was accepted by the Council.

John A. Ohihauser, Councillor for M.D. No. 26 was present and invited the Council of the Municipal District of Carbon to send a delegation to a meeting to be held in Arme at 2 p.m. on December 18th, the purpose of the meeting is to discuss the advantages of making representation to the Provincial Government to complete highway No. 26, running through Carbon, west to gravel, and also to extend the highway west to Carstairs.

DONATIONS TO THE RED CROSS FOR CARBON AND SURROUNDING DISTRICT

The drive for funds for the Carbon branch of the Red Cross is progressing and we commence below the publication of the donations to the local fund. These are in alphabetical order as received from the secretary, and we will continue the list until all names and donations have been published.

- Mrs. C. Anderson 1.00
- Ken Anderson 1.00
- Merle Anderson 1.00
- George Appleyard 1.00
- George Barber 1.00
- Robert Barber 1.00
- Mrs. T. Barber 1.00
- Gilbert Berdahl 1.00
- C. Castella 1.00
- Jack Connel 4.75
- D. D. Donimier (Three Hills) 1.00
- D. K. Edmundson 1.00
- Frank Frampton 1.00
- Joe Fraser 1.00
- Peter Funk (Calgary) 1.00
- Alfred Garrett 1.00
- Alfred Gibson 1.00
- Stanley Gibson 1.00
- Cliff Gibson 1.00
- G.L. Goldammer 1.00
- C.B. Guyton 2.00
- Edward H. Hay 8.00
- Chas. Hedstrom 1.00
- Miss Ida Kane 1.00
- Jim King 1.00
- T. J. King 1.00
- Miss F. Messenger 2.00
- J.D. Morgan (Three Hills) 1.00
- Fred McCracken 1.00
- G. C. McCracken 1.00
- Norman McCracken 1.00
- Norman McLeod (Three Hills) 3.00
- Glen McMan 2.00
- G. McMan 1.00
- Clifford Paget 1.00
- Otto Pallenon 3.00
- John Patterson (Redlands) 3.00
- E.E. Peterson 3.00
- Charles Riggs 1.00
- A. Semak 1.00
- Miss M. Stewart 1.00
- Miss E. Tricker 1.00
- Wm. White 1.00
- Cecil Ocker 7.00
- Mrs. J. Code 1.00
- Jas. Hudson 1.00
- Leo Johnson 1.00
- C. Jennings 1.00
- Jack Funk 1.00
- Mrs. J. Konich 1.00

The following pledges have also been made to the Carbon branch of the Red Cross Society:

- F. Press 1.00
- F.W. Gordon 1.00
- Edwin Johnson 1.00
- J. Knapton 1.00
- W. McKenzie 1.00
- W. McKenzie 1.00
- Jim Selby 1.00
- Eli Spry 1.00

Mrs. Williamson and Norma and Bill Oliphant moved to Calgary Saturday. Bill went to the hospital where he was found two hours before he died in his hand, the result of a recent accident, and the injured member had to be broken and re-set.

CONCERT ON DECEMBER 17th, IN AID OF THE RED CROSS

Members of the Adventist Deacons Society south west of Carbon will put on a concert in the Farmers Exchange hall, Carbon, on Tuesday, December 17th, commencing at 8:00 p.m.

Proceeds of the concert will be turned over to the Carbon branch of the Red Cross Society, and the people of town and district are asked to support the end-rising and make it a success. This concert was staged at Believer on December 4th and drew a large crowd. The admission charge is only 15 cents for children under 12 and 25c for adults.

C.G.I.T. GROUPS WILL HAVE SPECIAL SERVICE SUNDAY AT 7.30 P.M.

German, Polish and Czechoslovakian groups will be singing when Canadian girls in Training from coast to coast gather for their national Christmas Yesper Service, from Halifax to Victoria, in large centres and small towns, on the whole Dominion.

They will be worshipping together as one community, reading together the familiar Christmas story, and lighting candles as a symbol of the Light that came into the world at Christmas.

The service is being given by the church and community by poster which carries a reproduction of a photograph of a Canadian Girl in Training at work.

C.G.I.T. Groups in Carbon will hold the special service in the Carbon Union Church at 7:30 p.m. on Sunday, December 16th, and a warm invitation is extended to all who are in any way interested in the Canadian girl in the church. Here is a splendid opportunity for girls, leaders, parents and their friends to share in the work of religious education in Canada.

C. H. NASH RE-ELECTED PRESIDENT OF CARBON OLD TIMERS' ASSOCIATION

T.J. King, Vice-President; W.A. Brainerd, Sec.-Treas

The annual general meeting of the Carbon Old Timers' Association was held at 3 p.m. on Saturday, December 7th in W.A. Brainerd's store.

The following officers were elected for the ensuing year:

President, C. H. Nash; Vice-President, T. J. King; Secretary-Treasurer, W.A. Brainerd; Executive Committee: Mrs. Van Loon, Mrs. McNaughton, W.M. Douglas and H.M. McNaughton; Auditors: S.N. Wright and S. F. Torrance.

W.M. Douglas gave the following notice of Motion: "That 25 years old be the minimum age for children of Old Timers to attend the banquet and dance."

G.W. Appleyard gave notice of Motion as follows: "That the qualification for membership in the Carbon Old Timers Association be 25 years residence in the Carbon district."

The President stated that a general meeting would be held on Saturday, January 17th, 1941, to deal with these notices of Motion.

The report of the Secretary was read, showing a balance of \$97.85 and the Auditors' Report, stating that they had examined the books and found them in order, and the balance as shown in the communication was read, thanking the Carbon Old Timers Association for flowers sent during illness.

A hearty vote of thanks was given to the President, C.H. Nash, and the Secretary, W.A. Brainerd, for their services during the past year.

On motion of G. Gordon, and seconded by T. J. King, it was resolved that a dance be held in February next, and that the President and Secretary engage an orchestra.

NATIONAL NEWS SERVICE OVER THE C. B. C. STATIONS

Ottawa.—Plans for the establishment of a national news service prepared and edited by the Canadian Broadcasting Corporation's staff have been approved by the board of governors, a statement issued by Gladstone Murray, general manager, said. The statement follows:

The board of governors of the CBC has given final approval to the plans for establishment on Jan. 1 of a national news service prepared and edited by the CBC staff. The national news service will be carried by all CBC stations and in addition by all private stations needed to extend coverage throughout the country. The service will be available to all other private stations on a non-exclusive basis. No advertising will be permitted, the service being strictly uncommercial.

The CBC is setting up a radio news compilation staff at Ottawa, headed by Arthur of Toronto as chief editor. The staff will prepare news bulletins at Vancouver, Winnipeg, Toronto, Montreal and Halifax for use without advertising sponsorship over CBC stations and such other stations as request them.

The provision of this news service without charge is a continuation of the public service provided by The Canadian Press toward radio in 1933. Until 1939, The Canadian Press prepared a bulletin service at its own expense. From July 3, 1939, until the present the CBC has paid the cost of compilation of news bulletins by Canadian Press staff men.

"In lining up his staff, Mr. MacArthur is relying upon the experience of The Canadian Press in the radio-news field over the last seven years," Mr. Murray said. "The co-operation of the management of the Canadian Press in facilitating the shift over to the CBC compiling staff at the year-end has been admirable and invaluable."

The chief editor of the CBC National News Service has almost 20 years of experience in newspaper and publicity work. For the past five years on the staff of the Toronto Globe in the 20's and more recently for five years with Maclean Publishing Company. Prior to his appointment he was Ontario representative of the CBC in its press information department. He is a son of the late Peter MacArthur, noted Canadian writer and journalist.

The new radio set-up will mark the disappearance from the air of "The Canadian Press" which has been carried in four 15-minute bulletins daily over the CBC network. From Jan. 1, the CBC bulletins will be prepared from the world-wide news service of The Canadian Press and its allies, and from other news sources if the CBC so decides.

Under the contract, the CBC agrees to emit its news bulletins over nine CBC-owned stations and 25 privately-owned stations. All privately-owned stations designated as "news stations" will receive national coverage will receive the service free of charge. Any other stations may receive the service at no other expense than wireline cost.

More Storage Space

May Build Elevator Annexes At Head Of The Lake

Ottawa.—Pressing needs for additional storage space anticipated when the 1941 wheat crop comes into the market have resulted in the construction of extensive elevator annexes at the head of the lakes, according to well informed sources here.

The various elevator companies operating on the prairies were reported to be in negotiation for the subject of co-operating in erection of additional storage space at Fort William and Port Arthur. It would be of a temporary nature similar to annexes already constructed across the prairies at county elevators.

Providing of additional storage space would be private ventures, the federal government having no direct connection with the undertaking.

Cost Of Registration

Ottawa.—It cost something over 30 cents to record particulars of age, occupation and ability of each of the 7,683,472 people registered in the National Registration last August, according to a return tabled in the Commons.

Penalties For Sabotage

Washington.—The Senate approved legislation imposing drastic penalties for sabotage in national defense industries or materials.

Industrial Production

Shift In Canada's Economy Is Rapidly Approaching

Ottawa.—The shift in Canada's economy from that of a producer of agricultural and primary products to that of a nation capable of turning its natural wealth into the finished materials of war is being accomplished rapidly, Munitions Minister Howe told The Canadian Press.

The minister was commenting on a speech by Arthur Greenwood, minister without portfolio in the British House of Commons, to the effect that Canada would render greater help in the war than in the last because she was being converted into an industrial country.

Mr. Howe said the base for the accomplishment of "this greater help" had already been laid.

Some concept of the shift in emphasis and the immense set-up in industrial production can be gained from comparative percentages showing increases for September 1940, over September, 1939.

Taking from the minister's recent speech in the commons those are: Physical volume of business, 24; industrial production, 30; manufacturing production, 32; iron and steel production, 148; textiles, 22; construction, 120.

Largest individual increase in production was shown in cars and trucks, up 294 per cent. Pig iron was up 84, steel ingots and castings 32, British Columbia lumber 48.

Aside from direction and control, Dunlop's contribution to the department of munitions and supply in dollars-and-cents contrasts sharply with its instance upon heavy industry and munitions. Its gross sales were \$309,241, 113 between July 14, 1939, and Aug. 31, 1940.

During September, contracts were awarded at the rate of 32 a working day, a big increase over previous months. At Nov. 30, 1940, Canadian orders were \$240,000,000 and of \$348,000,000 thrown into the war production program.

Under this program, many products not formerly manufactured in this country will be produced, and some chemicals not before made in the British Empire.

Some new plants already are in production and many more will go into production within the next two or three months. Canada will make up for the loss of gun castings and equipment essential to the prosecution of modern mechanized war. A production of 2,000,000 shells per month is expected by the nation.

At present the automobile industry is producing about 400 automobile units a day, and the expectation is that this will be stepped up to 600 units, and that 2,000 heavy service trucks and buses will be turned out daily.

Similar expansion is found in other fields like ship-building, where 14,000 men now are employed.

C.B.C. Report

Fees From Radio License: Amount To \$2,906,603

Ottawa.—The Canadian Broadcasting Corporation in its annual report for the fiscal year ended March 31, 1940, reported income of \$3,752,601 and expenditures at \$5,058,071, leaving a net operating surplus of \$253,900.

License fees provided \$2,906,603. Other income was given as: Commercial broadcasting, \$70,867; subsidiary hook-ups, \$72,633; miscellaneous \$24,485; and a grant for the royal visit of \$47,440.

Expenditures were listed as: Program production, \$1,000,000; salaries, \$685,305; engineering operations, \$610,482; \$116,119; production and administration, \$108,119; press and information, \$84,539; interest on loans, \$23,837; and \$316,274 for depreciation.

During the year the CBC presented 1,845 radio and television broadcasts which occupied a period of 10,473 broadcasting hours or an average of more than 28½ hours of broadcasting a day. This compares with 18,610 broadcasts occupying 7,020 hours for an average of 19½ hours a day in 1939-38.

Greeks Are Grateful

Leaders Thank British Air Marshal For R.A.F. Assistance

Cairo, Egypt.—Air Marshal Sir Arthur Longmore returned to Cairo after inspecting British air force operations in Greece and conferring with Premier John Metaxas and Gen. Alexander Papagos. He also was received by King George. He expressed satisfaction with the way the airman was being equipped to new conditions on short notice. He said Greek leaders thanked him for the R.A.F.'s assistance.

Simple Ceremony

Vicount Rothermere Buried In Bermuda Graveyard

Hamilton, Bermuda.—Vicount Rothermere, who amassed one of Britain's greatest publishing fortunes, was buried simply in a Bermuda graveyard, 3,000 miles from home.

The 72-year-old financial genius who with his brother founded a great chain of newspapers and periodicals, was buried in the presence of only a few people after a short, unostentatious service at St. Paul's church in Paget parish.

Lord Rothermere died in hospital here. His body was taken to St. Paul's, where the rector, Archdeacon Henry Marriott, read the service. The grave was piled high with flowers, ordered by cable from many parts of the globe.

BRITAIN LOOKS TO CANADA FOR ARMS SUPPLIES

London.—Arthur Greenwood, member of the war cabinet, said today that Britain's greatest problem was the lack of raw materials. "The government hopes to make North America a second arsenal," he said. "The minister without portfolio in the Churchill government before he became an attentive house in his capacity as chairman of the committee directing the nation's economic war policy. The debate brought some of the sharpest criticism of the government since it was formed last May."

Mr. Greenwood said Canada's help will far outweigh anything she did in the last war. "Because we have taken the bold step of trying to convert her into an industrial country," he said, "the flow of supplies from Canada will continue to increase as new units of production come into operation."

Facing critics who complained of shortcoming in funds, ranging from employment policies to military strategy, Mr. Greenwood thus summed up the position:

"I do not minimize our difficulties, but I do not think the picture is altogether gloomy, although the situation is not one which we relish. It is true, as the prime minister said recently, that we are far from being fully armed, and so long as that remains the case, there will be increasing calls for further effort."

"We are co-operating now with the United States in order that our joint needs shall be met with the least possible delay and in order to ensure that we shall get the high priority that we undoubtedly need."

Leaside, Ontario, former war secretary, expressed dissatisfaction. "No doubt," he said, "the United States is doing its best to help us, but they are not on a war basis, only a semi-war basis, and they are not basing their production on the needs of the war."

"We should rely on ourselves," he said. "The real reason to look to the United States is that we are not doing it well enough."

"Until the whole resources of this nation—men, women and property—are mobilized for the prosecution of the war we cannot hope to defeat Germany."

Emmanuel Shinnell, Labour, accused the government in the commons of timidity, over-optimism and failure to face the fact that the dice of war are heavily loaded against alarming residents on Long's avenue.

It was better to bring the people to their senses, he said.

THEIR CONFERENCES IMPORTANT

Important conferences between Adolf Hitler, Ramon Serrano Suner, Spanish Foreign Minister, left, and Count Ciano, are expected to be climaxed by a vital announcement of Italian and Spanish collaboration with Germany of a new Balkan setup.

Shet By Police
"Windsor, Ont.—Roland Crosen, 19, died in hospital shortly after he was shot by police Constable G. Fitzpatrick, whose gun discharged when he slipped on the icy pavement while in pursuit of Crosen, believed to be a householder, alarming residents on Long's avenue.

Intensifying British pressure for expansion of United States aid short-of-war aims at the same thing.

Some of these things may mean that Britain's war leaders have set a new 1941 major offensive schedule. They imply, however, that the leaders now see possibilities of a break in the axis front at a much earlier date than they could have visualized only weeks ago.

Instead of bracing to meet a widely advertised axis attack in the Mediterranean, London seems to be eager to capitalize on the Italian rout in Greece by taking the offensive in the east.

Lab's Responsibilities

New Orleans.—The American Federation of Labor adopted a resolution condemning racketeering in labor unions and authorized its executive council to act should unions evade their "responsibilities."

Check Nazi Plans

Bulgaria's Refusal To Join The Triple Alliance Engineered By Russia

London.—Russia has checked German plans for a military offensive through the middle east, at least for the time being. Reports from Moscow state great prominence is being given in Russian newspapers to Bulgaria's refusal to join the triple alliance and to the presence in Sofia of a Soviet diplomatic mission. This journalistic display in Stalin's way of making known a Slav victory to the Russian people.

In Bulgaria, however, it is to be continued and there is a public display of deep satisfaction that the nation has not been forced into the war. It is beyond reasonable doubt that Russia has guided Bulgaria's policy in recent weeks, when the Germans were struggling to gain Sofia's adhesion to the tripartite pact.

If the Germans were to force their way through Bulgaria in order to attack Turkey and to try to reach Suez, their difficulties would be increased seriously. Without the co-operation of Bulgaria, the German general staff would have to face the possibility of eventual Russian entry, which might become active in the Turkish campaign because of Bulgaria's position.

SAVES LABOR MUST MAKE SACRIFICES TO WIN THE WAR

Ottawa.—A lengthening of the standard working week from 44 to 48 hours "or even higher" now must be considered in Canada since wartime industrial production has reached the point where a general labor shortage approaches, the labor minister, Hon. N. S. MacLarty, asserted in the House of Commons.

"We have reached the point at which, instead of planning to spread the work, we are actually asking workers to man our rapidly expanding war industries," he said.

"With the distressing news concerning heavy wrought by the enemy in such centres as Coventry, Birmingham, Bristol and Southampton still in the hands of the enemy, the (British) minister of shipping admitting that sinkings are going on at a greater rate than replacements, suggest that this is no time for us to be thinking of maintaining standards which do not take into account the urgency of the situation."

He said the only excuse for asking the temporary relinquishing of certain standards which labor establishment has been used to make is the war and sacrifice is unavoidable."

If the working week was lengthened it should not be made "ordinarily long," Mr. MacLarty said, because experience showed that beyond a certain point, fatigue, rather than offset any production advantage gained by longer hours.

"The present working week is short of the point at which fatigue becomes a factor and it may be found desirable to progressively lengthen the working week, as the available labor supply diminishes," he said. The sacrifice involved would be largely offset by increasing industrial production, by longer working hours, and by control against undue increases in living costs.

It had been urged upon the government that it should order labor to do certain things in the matter of wages or hours.

"There might be conceived some circumstances in which the government might order a compulsory action," Mr. MacLarty said. "But those circumstances do not exist today. What labor is looking for is not regulation but direction. It has made that abundantly clear."

"Dealing as we are with a co-operative movement, why the such action is necessary. That is the wrong way."

"The right way is to assume that the workers are fundamentally war and, that being so, that labor, organized and unorganized, is willing to contribute to the maximum effort in this critical time."

"It involves a definite consultation with labor, a testing-out of the view-point of the workers, and the stick is unnecessary when we are engaged in a common purpose."

There is a need for a new example of labor's co-operative action in the lengthening of the standard work week.

Local 353 of the International Brotherhood of Electrical Workers in Toronto had lengthened its work week to 48 hours for the duration of the crisis. Regina carpenters in Local 1867 of the United Brotherhood of Carpenters and Joiners of America had offered to work 48 hours a week on government war work at the regular wage rate.

Canada's Steel Production

Ottawa.—Operating at 92½ per cent. of capacity, Canadian steel furnaces are expected to produce in October, the Dominion bureau of statistics reported. Production of steel ingots and castings totalled 186,000 tons, compared with 164,515 in the previous month and 149,890 in the same month last year.

Arrived By Nazis

Basel, Switzerland.—Eighteen Alsatians have been sent to German concentration camps by the Strasbourg Neustadt-Brichen, because they had shown "irreverence by words and gestures" to Nazi Germany. The newspaper is published under German censorship in the Alsatian capital.

Car Plates For Scrap Metal

Hamilton, Ont.—Hamilton motorists are given an opportunity of assisting the war effort in an easy way by stamp auto plates. They are asked to leave their 1940 license plates at service stations and garages to be used for scrap metal by patriotic organizations.

Faith In Freedom

Brave Deeds Performed Without Hope Of Reward Or Fame

It has been the "decadent" democracies that have produced the finest acts of courage in this war; the outraged British cruiser closing in on the Graf Spee; the Finnish infantry cutting Russian columns to pieces in the grim winter forests; French regimental aides, betrayed, holding their part of the line like the Valentin against the German tanks and Stukas; British soldiers of the year guard at Dunkerque and British civilians manning motor boats to take the defeated but not beaten army home; British men and women—ordinary, plain-faced people who used to make a fuss about a cut finger—crawling out of their bombarded homes with the magnificent gesture of the unpunctured thumb; the crew of the Jersey Bay fighting their unarmored vessel against the German pocket battleship; the airmen of the R.A.F. going up in all weathers, against all odds, day after day, night after night, to guard the homes and shores of Britain; the bomb squad methodically rendering inoperative the devices that may explode at any moment.

It is the glory and splendor of these tremendous days that the brave deeds are done without hope of reward or fame. The commanding officer has no monopoly of the previous wealth of the nation. It springs up everywhere, from the immemorial trust of ancient states and from the mud and dust of streets. In the brave countries, the brave must still exist. We know that men have held this year for liberty in Czechoslovakia, in Poland, in Norway, in the Netherlands, in Belgium, in France, in China, in the tumbled mountains of Western Greece, in many a weary mile of desert. The whole earth, in the noble words of the old Greek who would be proud of his countrymen today, their republics. Though no monument can carry all their names, their fame lives for evermore.

Shall we deny courage to the German flyers who come over London? Not at all. They have testified their willingness not only to destroy and to kill but to die. But this courage of the free is a different thing. It is not madness. It is not a fanatical yearning for death. It is not personal loyalty to a leader. It is faith, a living faith in freedom. Where that faith did not exist soldiers laid down their arms and generals made base surrenders. Where it lives, and grows, and flames, no battle ever ends in a final defeat. Is democracy degenerate? Look around you. The gifted, the great, the humble, the unknown have given the answer, are giving it now as these words are written and read, in their own hearts' blood. —New York Times.

Historic Plane

Orville Wright's Kitty Hawk Packed In Cedar In England

An historic plane which was a forerunner of modern aviation, the first contrivance flown by Orville and Wilbur Wright at Kitty Hawk, N.C., in 1903—is packed in the deepest cedar of the North Forest in South Kensington as a safeguard against German raids.

While 1940 fighters and bombers roar overhead, the old Wright plane lies in the cases in which it was brought to England from the United States.

"We think it secure enough against a blast which might be caused by anything dropping in the neighborhood," a museum official said.

There has been periodic agitation for the return of the craft to the United States as an historic treasure but the official explained that it is entirely a matter for Mr. Orville Wright to decide.

"It is still his plane," he added, "although he has lent it to the museum for an indefinite period."

Supplies From India

Details of India's wartime production were reported when the 18th of India's units now is supplying small arms for the Royal Air Force; cotton for Greece and the middle east; canvas and khaki drill for Australia; other kinds of cloth for Iraq; engineering stores for Malta and vast quantities of lumber.

Besides all his other accomplishments, Leonardo da Vinci, a famous painter, was a "strong man," capable of bending iron bars with his bare hands.

During the first eleven months of war Canada bought 18,000,000 yards of woolen and cotton cloth for her armed forces.

The line of perpetual snow varies from 19,000 feet high in the Himalayas to sea level in Spitzbergen.

Honour Dead Of Historic Battle

Bronze Tablet To Be Placed On Brock Monument At Quebec Heights

Stirring days in Canada's early history were recalled when a bronze tablet bearing the names of those who gave their lives in the Battle of Quebec Heights on October 13, 1812, was placed on the Brock Monument. This well known and impressive monument was erected in 1893 in commemoration of the civil and military services of Major-General Sir Isaac Brock, who was killed in action during this historic engagement. Inscriptions relate that General Brock and his staff-officer, Lieutenant-Colonel Macdonald are buried in the vault beneath. The massive monument is visible for many miles, and each year is visited by thousands of people from all parts of the world. Recently the Historic Sites and Monuments Board of Canada, which co-operates with the Department of Mines and Resources in the marking of national historic sites, composed a list of the names of members of the regular army, the Canadian militia, and the Indian warriors who were killed in the battle at Quebec Heights. This list was prepared from records in the War Office in London and in the Archives in Ottawa. The tablet was unveiled on October 12 last, 128 years after the battle, in an impressive ceremony arranged by the Historic Sites and Monuments Board of Canada.

Detachments from the Lincoln and Welland Regiment, the Dufferin and Richmond Regiment, and the Argyle and Sutherland Highlanders, were present. Professor Fred London, of the University of Western Ontario, represented the Historic Sites and Monuments Board, and an outstanding feature of the ceremony was an address delivered by Mr. W. F. Powless, an Indian of the Six Nations Reserve, Brantford, who spoke with much eloquence.

Must Undergo Change

Germany Will Have To Set Up A New Set of Morals And Values

Dr. H. von Robert Vansittart, British diplomatic adviser to the British government, said in a broadcast that Germany will have to undergo a "complete change of heart, and adopt a new set of morals and values," if it is to live with other nations of the world.

"The world must never again take anything for granted in Germany, or be led by its illusions," he said. "Before the war, people wanted to believe the best of Germany, but they failed to see ahead."

There had been Germans who hated the Nazi regime, he said, but "we are not dealing with individuals." "The German people has a moral character," the German says. "And it is the Germans who count."

Hitler was the "natural product" of a nation which had been weak through history. It was necessary to examine the past record of Germany to set ahead.

"The real German information is yet to come," Sir Robert said. "There have been reformers in the past, but they have always been a weak minority."

"Germany's past had been both 'plain and ugly,' and the ground had been prepared for Stalinism before Hitler came to power, and moved the dragons' teeth."

No Lord Mayor's Show

Traditional Ceremony in London Was Omitted This Year

Sir George Wilkinson, London's new Lord Mayor, who was elected at the Guildhall a few weeks ago with the usual ceremony, caused no surprise when he said that there would be no Lord Mayor's Show, and that his year of office would be almost bare of formal entertaining. Sir George is 56, and will be the youngest Lord Mayor within living memory. By dispensing with the Lord Mayor's Show and the banquet at the Guildhall, Sir George may well find that events permit him to live within his allowance of £12,500. In peace time a Lord Mayor reclines that his year of office costs him £10,000, something over £10,000 of his own fortune.

Farming Fifty Years Ago

Old-timers on the Canadian prairie are recalling the harvest season of 1887 when the first real bumper crop was harvested. There were few elevators; freight cars were scarce and no facilities for storage on the farms; yet these pioneers were resourceful enough to buy tape sacks for the grain and pile them at the nearest siding. It finally reached the lakehead and most of it graded No. 1 hard.

Before knitting and weaving were invented leg coverings or stockings were made of leather.

KING AND QUEEN CHEER LONDONERS IN SHELTERS

Their Majesties the King and Queen paid a surprise visit to one of London's bombproof shelters the other day, and were photographed, above, as they spoke to one of the cooks who helps provide cheap meals for people bombed out of their homes.

Closely Guarded Secret

Sperry Bomb Sight Fink Its Target

The Sperry bomb sight is believed to be one of the most accurate in the world and was the United States' most closely guarded military secret.

Results of bombing practices by United States air squadrons were made public but it is known extreme accuracy has been obtained on targets such as ships from heights as high as 30,000 feet. Its accuracy was said to be such that dive-bombing, as practiced by German airmen, is unnecessary.

After each bombing practice by American squadrons, the sight is removed from every plane participating and is locked in a vault guarded by sentries. To avoid revealing construction secrets, parts of the bomb sight were built at several separate plants, none of which was to be divulged.

The only comparable sight to the Sperry mechanism is the Norden sight, manufactured by the Norden company and developed by the American navy. It now is standard equipment on ships in both branches of the American forces.

Old Custom

History is interesting and at times ridiculous. For instance, the Great Buddha at Karmakura, Japan, wears 820 curls upon its majestic head. The curls, according to legend, represent snails which once crawled upon the original goal to which his laid path from the sun.

At one time, British ships were grouped in a's ratings, according to the number of guns they carried. "First rate" came from a naval term belonging to that period.

England's air force is now at its peak of efficiency and fighting power. Planes ordered during the war with Russia at its height a year ago, arrived after peace was made.

The less a man boasts the more true worth he possesses.

Demand For Eggs

10,500,000 Dozen Shipped To Britain In Ten Months Period

Canadian shipments of eggs to Great Britain in the first 10 months of 1940 totalled more than 250,000,000 dozen, compared with 1,024,070 dozen eggs shipped to the United Kingdom in 1939, the agriculture department announced.

"There still exists this year an opportunity to ship an additional quantity under the last British treasury sanctions for the purchase of eggs in Canada," the department stated.

"With respect to the prospects of the Canadian poultry industry in general, it is already apparent that, as a result of increased industrial activity throughout Canada, there is a material increase in demand for eggs on the domestic market and indications are that this will be accelerated during the coming year," said the department.

Gifts Appreciated

Navy Men Are Grateful For Contributions From Red Cross

Lieut. Commander Earl Beatty, of the Royal Navy, son of the late Admiral Earl Beatty, said at a Canadian Red Cross luncheon in Toronto that he hopes "you will tell every Red Cross branch in Canada that you heard the praise of a navy man who has seen your gifts and knows how much they are appreciated by every sailor."

When I was in England five weeks ago I saw Red Cross supplies of woolen comforts go out to men on minesweepers and contraband control ships."

Factory lands of pig iron, ferrous alloys, steel ingots and castings, and finished rolled products in Canada were valued at \$75,834,481 in 1939, an increase of 27 per cent over 1938.

The motorists with the worst manners in the world are the ones who drive the other cars.

MRS. SMUTS GREETES GUESTS EN ROUTE TO AUSTRALIA

Mrs. J. C. Smuts, wife of the South African Prime Minister, was at the docks at Cape Town when British evacuee children arrived for a short stopover before continuing on to Australia. We see the happy youngsters handing autograph albums to Mrs. Smuts for her signature.

Salvaging Ships

Shipping Losses Not Always As Bad As They Appear

News of British shipping losses is not always as bad as it seems. When merchant ships are announced as victims of enemy action a proportion may live to sail another day—thanks to salvage experts of the navy.

Whenever a vessel is mined, bombed or torpedoed near the British coast in a position which offers them seagulling "wreckers" a sporting chance, they start to work. They do so with three objects:

1. To refloat the vessel and bring her into port.
2. If the vessel can't be saved, to salvage as much of her cargo as possible.
3. If both vessel and cargo are beyond hope, to remove as much valuable scrap iron as possible.

One ship which struck a mine in this district was a considerable distance off shore and lay in a bad position. But the sea was calm and the salvage men went to work. The cargo of cereals was removed and when the mine had been removed the excellent fodder. A temporary patch was put over the hole beneath the ship, where the mine had struck and the wreck was towed into port for dry-docking.

A really dangerous wreck when you get an exposed wreck some way off shore. My men risk being attacked by the Jerries while they are working," said the chief salvage officer.

Taking Job For Granted

Many Who Become Careless Find Themselves Out Of Work

Smith took his job for granted. Ten years before, he was a stenographer. Ambitious, efficient, painstaking, he was soon promoted to the sales force and within five years seemed headed for ultimate partnership.

Something happened, Smith became careless and indifferent. He was frequently late for appointments, overstayed his time at lunch, assumed a dominating attitude and shirked his fellow-employees, and towards his work generally. Smith was slipping.

Due at the office at nine o'clock, he began to saunter in half an hour late. One morning he came in at a quarter to ten. His employer said: "Smith, you should have been here at nine o'clock."

"Why," responded Smith, "what happened then?" "Smith, you're tired!" "Smith was stunned. It was unbelievable. The firm couldn't get along without him. He was indispensable. It must be a joke."

But he said that he was in the face. He was discharged—out of a job—not wanted. Ten years of his life wasted and all because . . .

You know the type. The man who is so sure of himself that he relaxes his efforts, thinks he is entitled to take the easy way, no longer creates useful ideas, gets into a job rut—in short, fails to take his job seriously.

Thousands of men are just like Smith. Careless, willful, self-satisfied, they go on from day to day, scarcely aware that their job until one day the axe falls and they are out on the street.

Success is achieved only through efficient and unrelenting effort. The road is straight, often difficult and discouraging, but those who follow it persistently and intelligently, in due time receive recognition and reward.

This Cowboy Is Different

Wooden Model Can Be Taken Apart

Like Algeva Purdie, a hankerin' to do some wood whittlin'. So he got a piece of sugar pine and began to cut out a cowboy rider a bronc.

Four hundred hours later young Cooper had a finished cowboy, colored with water-paints and everything. The wooden cowboy was something different. First the rider could be taken off the horse. The hat, chaps and spurs could be taken off the rider. Then the saddle and hackamors would come off the horse.

It almost took a life-size artist to put the cowboy and horse together again. British scientists say that a plate glass window within 200 feet of a bomb explosion has little chance of survival.

Our ancestors reckoned time by nights and winter hours. "Fortnight," a contraction of 14 nights.

Army life is an education in its own right. If you don't know beans you soon will.

CARBON AND DISTRICT NEWS NOTES

The wind temporarily switched to the north Sunday afternoon and a heavy wet snow fell for a couple of hours, making roads and streets slippery. Fortunately the storm did not last long and mild weather continued, although the forecast is for a little colder weather.

Mrs. F.A. Arty and Sharon spent the first part of the week in Calgary.

Mr. and Mrs. W. F. Ross were Calgary visitors Sunday, returning Monday.

Cyril Foxon and Ross Dunlop went to Brooks Monday and brought back Rev. McNamee's car, which we understand is for sale.

Check over to the supplement which accompanies this issue.

Mr. G.F. Meers is the new bookkeeper at Garrett Motors.

Mrs. B. C. Downey and Mrs. Jas. were Calgary visitors Friday and Saturday. Mr. Downey and Lorraine moved to the city Saturday and the party returned home in the evening.

Mrs. A. J. McLeod had as her guest last week her sister, Miss Jean McGill of Calgary.

Friends of Harley Davidson of the Ghost Pine district will regret to learn that he is in the Holy Cross hospital, Calgary, where he is undergoing medical treatment.

Bill Cameron, who recently was operated on for appendicitis, returned home from Calgary Monday.

The weather turned colder Tuesday night and more snow is in sight.

Mrs. Pickard was a Calgary visitor last week.

W. Leitch was busy Tuesday morning when he cut a cutting of coal slick on the Village streets, which had become very slippery following the sleet storm Sunday.

Charlie Nash's new house of portliness at the store would show up in a fog with its new lumber. He should complete the job with a coat of paint.

Mrs. Cyril Olmsholt and Gerald were Calgary visitors Sunday and Monday.

Mrs. Alf. Hovik was operated on for appendicitis in Calgary hospital on Saturday and latest reports are that she is progressing favorably.

SCHOOL CLOSERS DECEMBER 20:
RE-OPENS ON MON. JAN. 6th

Carbon school will close on Friday, December 20 and will reopen for the next term on Monday, January 6th, so there will be plenty of time for pupils to recover from a too vigorous Christmas spirit.

Principal F.H. Steele remarks that it would be greatly appreciated, especially in the High School room, if parents will see that the students keep up a high standard of attendance during the new year. Late entries and sickness have cut into the attendance so far this school year much more than is compatible with sustained efficient work and this handicap must be overcome during the balance of the school year.

FURTHER INSTANCES OF
DELAY IN MAIL AND PARCELS

When the freighter "Beaverford", which was recently sunk in the Atlantic, went down it carried 11,000 parcels of tobacco intended for soldiers overseas, according to further word by the post office department.

A further instance of "unavoidable" delay in the delivery of overseas mail has also been released. The cover of an item of mail matter received on November 29th by an officer of the Department has been submitted and the date stamp shows that it was mailed at a Field Post Office in England on October 17th. The letter was included in the mail placed on board S.S. "Beaverhill" which left England on October 18th. This steamer was subsequently attacked by the enemy and was forced to return to England for repairs; upon completion of repairs the steamer sailed again and arrived in St. John on November 28th. Delivery of mail on board was effected in Ottawa on November 29th—43 days after mailing.

These facts are being placed before the public in order to clear up considerable misunderstanding and reasons for non-delivery of mail and parcels or delay of delivery. Many other examples could be given if records were made public, but the above should suffice and explain the problems which arise and render it difficult to provide an interrupted mail service under present day conditions.

Place your orders now for future delivery of Counter Check Books. We are direct factory representatives. The Carbon Chronicle.

GERMINATION TESTS

Farmers in the prairie provinces will be interested to learn that this Department has decided to offer germination tests of field crop seeds as a free service. In order that the tests may be thoroughly reliable, modern thermostatically controlled germinators are being installed. The equipment has been designed in consultation with officials of the Production Service, Plant Products Division, of the Dominion Department of Agriculture. Reports on samples submitted for testing will include remarks on the presence of weed seeds and general "soundness."

Samples of seed should be taken to the nearest country elevator belonging to any of the line elevator companies associated with the work of this Department. These companies are listed on most of the publications issued from this office.

Sufficient material will be provided by 2-ounce samples, but these must be delivered at the earliest possible date. It is necessary that our laboratory be in full operation by January 1st in order to avoid congestion in March.

In addition to the germination tests, we shall be glad to make growing tests and to report on the purity and suitability of the variety for the district concerned. If the growing test is desired in addition to germination, it is only necessary to inform the local grain buyer.

DRUMHELLER MUNICIPAL HOSPITAL
SALE OF
SPECIAL CONTRACTS

The Board of the Drumheller Municipal Hospital District No. 3 announces that Special Contracts will be made available to those persons who are desirous of obtaining the \$1.00 per day rate and reduced rates for special services for themselves and their dependents at the hospital in Drumheller. Sale of these contracts will begin immediately and will continue until midnight December 31, 1940. These contracts will go into effect January 1st, 1941, and will remain in force until December 31st, 1941. Contracts may be purchased at the business office of the hospital in Drumheller for the sum of \$10.00. Any further particulars desired may be obtained from the undersigned.

L. WILSON, Secretary-Treasurer

Test Your Seed Grain!

Pioneer Elevators have available modern seed grain germinating testing machines. Any farmer wishing to have his seed grain tested for germination may obtain tests free of charge at any Pioneer Elevator.

Copies of our Weekly Letter dealing with current grain matters are available at our local elevators.

THE USED CAR

The used car is my automobile. I shall not want another. It maketh me to lie beneath it. It leadeth me beside the repair shop. It soureth my soul. It leadeth me in the path of ridicule. Yea, though I ride in the valleys, I am towed up the hills, for I fear much evil when it is with me. Thy brakes and thy engine discomfort me; I have a blow-out in the presence of my enemies. I anoint my tires with patches, my radiator runneth over. Surely, if this thing follow me all the days of my life, I will dwell in the bug-house forever.

DOG RESCUES OWNER
FROM ICY WATER IN RIVER

VANCOUVER—For rescuing his owner, James D. McLean of Vancouver, from the Fraser River in October, 1939, "Alaska" 92-pound Malemute has been awarded the Dog World's International Diploma.

The rescue took place at Yale, where McLean was employed as an investigator with the C.N.R. McLean and the dog were crossing the river in a rowboat, which was crashed by a submerged floating log. Man and dog were forced to swim for shore, and McLean suffered a cramp in his leg. Heeding the call of his master, the dog turned back and went straight for him. McLean threw his arms around the dog's neck and they reached shore, where McLean lapsed into unconsciousness. When he revived, he found the dog licking his face.

YOUR NEWSPAPER

I am the guarantee of the Canadian way of life . . . the way of liberty . . . the way of equal opportunity . . . the way of free enterprise . . . the Divine way and the true way for national well-being and upward advancement.

Weekly I go into your home . . . In winter, in summer, in spring and fall. I chronicle your birth, your marriage, your death and the intervening events which make for joy and sorrow, depression, and exaltation, health and pestilence, poverty and wealth, weakness and strength.

Freeborn am I, and true to my heritage. I am not the subservient carrier of propaganda that enabled a Hitler to become master of Germany, nor am I the complacent press that contributed to France's downfall. I am a friendly visitor. You will find me constantly at your right hand day after day, at your fireside, on your porch swing, or at the breakfast table. I have character, and even when it hurt, you would not have me spineless.

I provide you with a special civic service. I support to the last drop of ink your charities, community chests, Red Cross Drives, your schools, church activities, clubs—yes, I assist in the building of community character. Through advertising I promote your trade, move your commodities, advance your living standards. I am a bit bashful about mentioning these things, but I want you to rest assured that I am your friend.

I am the Canadian home-town newspaper, and without me, your liberties would vanish.—Dunnville Chronicle.
